#### WONDER PIGEON: THE MOST POWERFUL PRODUCT ON THE MARKET

Wonder Pigeon is a **PATENTED AND UNIQUE** formula. As result of studies, research and practice, it was shown that it really improves the digestion, the condition and the flight training of the birds!

Wonder Pigeon is not just another 'food supplement' for pigeons. It changes radically the way pigeon fanciers take care of the health status in their pigeon lofts and it's regularly used daily by almost all the professional European fanciers.

- The one and only effective against young bird disease if used continuously
- Prevents and treats intestinal problems (natural antibacterial effect)
- Greatly simplifies the approach to Pigeon health and recovery
- One of the cheapest products on the market: 1kg bottle is enough for 100 days for 100 pigeons

**OPEN YOUR EYES**  
on the health of your pigeons

# A NEW ERA

FOR PIGEON FANCIERS

Give your pigeons all the chances.

## WHAT IS WONDER PIGEON?

An additional feed **with astonishing results in coupling, laying, hatching, breeding and racing performances** and this without any contra-indications. A combination of fatty acids with a natural antibacterial activity and super recovery qualities.

Wonder Pigeon is a dietary supplement produced specific for racing pigeons. It has been developed as a patented mixture of monoglycerides and diglycerides of butyric acid, caprylic acid, capric acid, propionic acid and lauric acid.

### Antibacterial effects of wonder pigeon:

- If used regularly no need to treat the birds with antibiotic for intestinal diseases
- If used regularly is effective to treat intestinal infections like "young bird disease"
- If used regularly is effective against intestinal bacteria like Coli, Salmonella, Clostridium, ecc

### Effects of wonder pigeon on the intestinal flora:

It improves the intestinal health of the pigeon by a selective non-pH dependent anti-bacterial effect:

- Increasing the appetite and supporting the metabolism
- Recovery of the intestinal flora and correction of digestion
- Increasing nutrients absorption and strengthening of the natural resistance

### Easy to use with no contraindications

- It can be used in the drinking water or on the food
- It can be mixed with whatever other product
- It is stable in the water for 24h

### Innovative and cheap

- One of the cheapest product on the market (1kg bottle is enough for 500 litres of water)

### Method of administration:

#### Breeding period:

Daily 2 ml Wonder Pigeon / litre of drinking water or 4 ml / kg of food (with youngsters - brooding period).

#### Young birds:

Daily 2 ml Wonder Pigeon / litre of drinking water or 4 ml / kg of food.

#### Racing season:

The day of arrival + the day after: 2,0 ml Wonder Pigeon / litre of drinking water.

The day of shipment + the day before: 3 ml Wonder Pigeon / litre of drinking water or 5 ml / kg of food.

#### Moulting period:

Daily 1,5 ml Wonder Pigeon / litre of drinking water or 3 ml / kg of food

**Easy to use: syringe to pull out the liquid from the top.**

Pascal Arien (BE)

“ WP greatly simplified my life as a pigeon coach. I needn't worry about my pigeons' health no more and now fully focus on getting them into the best shape. ”

Hugo Batenburg (NE)

“ I give WP to my racers, breeders and young birds every day and the pigeons are in a very good condition. The drops are very good and the young birds don't have adeno anymore. ”

“ Wonder Pigeon is a great product, within two weeks of using I have seen a difference in the condition of my birds, their feather quality has improved and their general health is better, I have also not seen young bird sickness since introducing. ”

Mark Gilbert (UK)

Stella Rossa (IT)

“ We are using WP since 2014 in breeding and racing. We experienced a lot and WP is something revolutionary : 2014 and 2015 were our very best seasons ever! WP is the perfect solution to recover and to keep a super intestinal health at once. Easy to use and no negative side-effects at all. ”
