HORMOFORM

from **harkers** – *for year round success*

**New Formula with added Beetroot Powder –
for improved digestion, brain function, and race
performance**

Hormoform may now look a little different compared to what you have been used to, but nutritionally our new formula is superior in every way, and with improved palatability, birds love the taste more than ever.

Having recently received a bag of the new formula Hormoform I have to say that I am really delighted with how all my pigeons instantly 'tucked in' and cleared it rapidly, even though some compartments had been given a light feed only 3 hours earlier.

Even more pleasing was the fact that this much dryer compilation doesn't dampen and stain the floor as the red oxide formula had done before. Previously these damp areas particularly in the food hopper was the only downside for me of feeding Hormoform. Without doubt it still brings on great condition in the pigeons, helps greatly with new feather growth in the Winter moult, but most importantly helps me to rear good strong healthy youngsters.
